

Test Summary For Finance Man

Test Summary

Project Name: FinanceMan Web Application

Test Duration: [Insert Duration, e.g., 2 Days]

Tested By: [Your Name/Team Name]

Test Date: [Insert Date]

Summary Overview

The testing process focused on validating the core functionalities of the **FinanceMan** application, covering key features such as **Login, Transaction Management, Export/Import, Add Income/Expenses, and Sorting**. Several **critical, high, and medium-severity bugs** were identified, which impact both functionality and user experience.

Key Highlights

1. Modules Tested:

- Login Page
- Signup Page
- Dashboard (Current Balance, Add Income/Expenses)
- Transaction Table
- Export/Import CSV
- Sorting and Filtering

2. Testing Techniques Applied:

- Functional Testing
- UI/UX Testing
- Negative Testing
- Boundary Value Testing

3. Bug Summary:

- Total Bugs Reported: **23**
 - Critical Bugs: **1**
 - High Severity Bugs: **0**
 - Medium Severity Bugs: **3**
-

Overall Test Results

- **Pass Percentage:** 60%
 - **Fail Percentage:** 40%
 - **Pending Fixes:** 23
 - **Retest Required:** Yes
-

Conclusion

The FinanceMan web application requires critical fixes for core functionalities such as **Login**, **Export CSV**, and **Add Income/Expenses**, which are directly affecting user operations. Other moderate issues like incorrect sorting and missing validations must also be addressed to enhance the application's reliability and usability.
